

FOR IMMEDIATE RELEASE

Breakthrough Liquid Metal Treatment Product Expanding Market Into Africa

Published: Thursday, January 2nd, 2014
By: BOSFMS Ltd.

MoreMPG of Canada is proud to announced the appointment of BOSFMS Ltd. of Uganda as its lead **INTERNATIONAL SALES AGENT** for the Africa continent.

MoreMPG specializes in carbon footprint reduction and fuel & power cost savings using advanced lubrication nano-technology for application to internal combustion engine, transmission, differential, hydraulic, air-conditioning systems and power plant/industrial equipment. This advanced metal treatment is designed to enhance performance of any rigid or semi-rigid surface where sliding, rotating or oscillating harmonic friction occurs.

MoreMPG is an environmentally safe, non-flammable, inert formulation with zero V.O.C.'s (volatile organic components). It contains no solvents, silicone, graphite, molybdenum or PTFE's. Most importantly, it will not change the viscosity of any OEM recommended fluids. MOREMPG™ reduces toxic emissions by as much as 92% from Hydrocarbon, NOx, PM, and Carbon Monoxide.

This advanced technology is a foundational element for greenhouse gas reduction and long-term eco-sustainability.
